-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Drawings*

1. The drawings were received on 11/20/2004. These drawings are acceptable.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by US patent 6,566,662 (Murakami et al). In reference to claims 1 and 4, Murakami discloses a method and apparatus for testing a substrate by irradiation of a charged beam, having a scan parameter calculating unit for calculating a stage speed and an irradiating position of a charged beam on the basis of an array of measurement points, a stage control unit for controlling the movement of the stage; and beam control unit for controlling the irradiating position of the beam (claim 1, column 5 lines 21-41). In reference to claim 2, Murakami discloses a substrate testing

apparatus having a measurement point acquiring unit for acquiring the array of measurement point on the basis of each substrates species (abstract).

4. In reference to claims 3, 5 and 6, Murakami discloses a substrate testing apparatus wherein the substrate species information is the array of measurement points in the unit area or the substrate species, the measurement point acquiring unit acquires the array of measurement points by directly inputting it or by inputting the substrate species and referring to corresponding date between the measurement points and the substrate species (column 5 line 16-column 6 line 2).

### *Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 6,490,025 (Makinouchi et al), 5,821,550 (Yamashita), 6,242,751 (Takemoto et al), and 6,433,872 (Nishi et al). All of the cited US patents contain art similar to that being claimed by applicant, more specifically, exposure methods and apparatuses.
